Health Summary

Blood Sugar Management

Fasting blood sugar has been trending upward over the past 4 weeks (avg 140 mg/dL). HbA1c at 6.8% indicates pre-diabetic range.

Suggested Action

Consider discussing with Dr. Reddy about possible medication adjustment.

Needs Review

Source Records

CBC from Apollo Hospital · 12 Feb 2026

Blood Sugar Readings (7 days)

Blood Pressure Overview

Blood pressure readings have improved over the past month (128/84 avg). Current treatment appears effective.

Suggested Action

Continue regimen and follow next check-up in 4 weeks.
